

FUND OBJECTIVE

This fund aims to provide capital growth and create wealth over the long term by investing mainly in listed local equities. The fund is high risk and targets investors with a high risk appetite and a long term investment horizon.

STRATEGY

The Bifm Local Equity Fund invests predominantly in listed local equities, with leeway to invest in offshore equities and convertible bonds up to a limit of 20% and 10% respectively.

WHY CHOOSE THIS FUND?

The fund is appropriate for investors with an appetite for high risk and tolerance for periods of high volatility who wish to generate capital growth over the long term period.

Collective Investment Undertakings (CIUs) are generally long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices. Commissions and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Different classes of units apply to these funds and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from Bifm Unit Trusts (Pty) Limited. Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit trust fund including any income accruals and less any permissible deductions (which may without limitation include brokerage fees, VAT, bank charges, audit fees, trustee fees and the annual management fee) from the fund divided by the number of units in issue. Performance figures are based on lump sum investments with income distributions reinvested. The investment objective of the fund shall be compared with the investor's objective, before an investment decision is made by the investor. The Total Expense Ratio (TER) cannot be taken as an indication of fund performance. The current TER cannot be regarded as an indication of the future TER. The fund is managed to comply with the Collective Investment Undertakings Act Cap 56:09 (and shall be amended from time to time). Exposures in excess of the limits will be corrected immediately except where due to market value fluctuations or capital withdrawals in which case they will be corrected within a reasonable time period. Bifm Unit Trusts (Pty) Limited, Company Registration Number: CO2009/2597, is approved by the Non-Bank Financial Institutions Regulatory Authority as a Unit Trust Management Company. Bifm Unit Trusts (Pty) Limited does not provide advice on investments, but does present clients with information on all Bifm Unit Trusts CIU funds. The fund prospectus may be acquired free of charge, from Bifm Unit Trusts (Pty) Ltd.

ASSET CLASS EXPOSURE

SECTOR ALLOCATION

PERFORMANCE FOR Q1 2019

The Bifm Local Equity Unit Trust Fund appreciated by 1.42% over the fourth quarter, outperforming the benchmark (Domestic Companies Index, DCI) return of 1.07% by 0.35%. Over a 12-month horizon, the fund, although reporting a decline of 2.71%, achieved a 0.51% outperformance over the benchmark's decline of 3.23%.

QUARTERLY COMMENTARY

The first quarter of the year continued to show some signs of a recovery in the local equity market as the Domestic Companies Total Return Index (DCTRI) appreciated by 1.047% while the DCI appreciated by 0.43% after another positive movement during the final quarter of 2018. However, the price growth was concentrated in three stocks; FNBB which appreciated by 4.08% while Sechaba and BancABC appreciated by 2.50% each. The rest of the market continued to face price pressures.

On the global front, offshore markets rebounded in the first quarter of 2019 led by the US-domiciled growth stocks that retreated sharply at the end of 2018. This created a difficult environment for value stocks such as banks which suffered the double impact of low growth and low yields. This turnaround, however, was enough to recoup the bulk of losses sustained in the final months of last year.

TOTAL EXPENDITURE RATIO (T.E.R.) – 2.73%
