

FUND OBJECTIVE

d

The The Bifm Unit Trusts Money Market Fund is a capital preservation fund that principally invests in low risk assets to manage short term cash needs. These comprise of cash and call deposits. More importantly, they also include fixed deposits, BoBC-linked deposits, Treasury Bills (T-Bills) and structures with a maturity of less than one year. Cash and call deposits are held for liquidity purposes and yield a relatively lower return. Short term structured deposits and instruments such as short term loans are yield enhancing products that are made for a fixed period and thus provide less liquidity when measured against cash and call deposits.

STRATEGY

The BIFM Money Market Fund invests in Call and Fixed deposits and Treasury Bills. We actively manage the portfolio, by seeking yield enhancing assets, without compromising the risk and maturity profile of the fund.

WHY CHOOSE THIS FUND?

This fund is suitable for investors who want high yields but need their fund to remain liquid.

PERFORMANCE AS AT 31st DECEMBER 2016

PERFORMANCE FOR Q4 2016

In the 4th quarter of 2016 (Q4 2016), the Bifm Unit Trusts Money Market fund returned 1.07 %, an outperformance of 91 basis points (bps) against the benchmark of 0.16%. The BUPUMM Fund outperformed the benchmark over the 1 year, 3-year and Since Inception periods. The outperformance is mainly due to our lengthening of duration on the money market side when money market instruments were attractively priced.

Collective Investment Undertakings (CIUs) are generally long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Unit trusts are traded at ruling prices. Commissions and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Different classes of units analypt to these funds and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from Bifm Unit Trusts. (Pty) Limited, Unit trust prices are calculated on a net asset value basis, defined as the total market value of all assets in the unit trust fund including any income accurals and less any permissible deductions (which may without limitation include brokerage (esc). NAT, bank charges, audit fees, trustee fees and the annual management fee) from the fund divided by the number of units in issue. Performance figures are based on lump sum investments with income distributions reinvested. The investment objective of the fund shall be compared with the investor's objective, before an investment decision is made by the investor. The total Expense faito (TER) cannot be taken as an indication of fund performance. The current TER cannot be regarded as an indication of the fund shall be compared with the collective investment Undertakings (Act Cap 55:09 (and shall be amended from time to time). Exposures in excess of the Normace figures are based on lump sum investments with incluations capacity with dure contract and the endertaket value functions capacity as an indication of the fund shall be compared with the collective investment Undertakings (Act Cap 55:09 (and shall be amended from time to time). Exposures in excess of the limits will be corrected investment but contract value functions capacity with the collective investment of by Unit case. The fund is managed to comply with the constructions contract value functions capacity as a unit. Trusts (Pty) Limited does not provide advice on investments, but does present clients with information on all Birm Unit Trusts CIU funds. The fund prospects may be acquired free of charge, from Birm Unit Trusts (Pty) Ltd.

QUARTERLY COMMENTARY

d

Rates on money market instruments have remained generally low in the 4th quarter of 2016. The Bank Rate was reduced in August 2016, by 50 basis points (bps). Since then, yields in the local market have fallen, with short term yields less affected than those at the medium to long end of the curve. The central bank loosened monetary policy in February 2015 and August 2015, cutting both the Bank Rate and the primary reserve requirement (PRR). The PRR was reduced from 10 % to 5 %, releasing close to P2.3 billion of liquidity in the domestic economy in April 2015. Inflation closed the year 2016 at 3.00% at the lower end of the target range of 3 to 6 %. It averaged 2.8 % in 2016, below the target range of 3 to 6 %. We expect supportive monetary policy on account of the fragility of the local economy and the unstable world economic outlook.

OUTLOOK AND STRATEGY

We expect interest rates to remain low in the near future. The August key rate cut was reflected in credit money market instruments yields. In the first quarter of 2015 short term deposits could fetch close to 10% on a one-year tenor, the same maturity is fetching about 3-4 % from major local banks in the 4th quarter of 2016. Domestic liquidity has been a bit unstable for some local banks in the last quarter; this instability has made some short term rates volatile as they moved in function of the needs in the market.

TOTAL EXPENDITURE RATIO (T.E.R) - 1.21%
